IEG Vantage, a part of Agribusiness Intelligence is the world leader in comprehensive agricultural, commodity and transportation market research, analysis and consulting. Founded in 1977, the company now serves more than 750 firms and institutions worldwide. From its headquarters in Memphis, Tennessee, IEG now spans the globe with a far-reaching network of services and clientele.

The company's professional depth and experience provides a wide range of services related to the economic, strategy and management concerns of clients. Underpinning these services, its principal strengths lie in an expansive information base and a professional and experienced staff. Sister divisions that contribute to the transportation information base and network include Maritime Intelligence.

Representing Informa's primary asset, its employees are well-trained and seasoned researchers and consultants with extensive backgrounds in business and government; most hold advanced degrees in agriculture, business, economics or related fields. The IEG Vantage team has extensive experience in transportation, agribusiness and similar areas as well as in agricultural policy decision-making. Many employees have gained insights from past government service in senior policy, analysis and advisory positions; from major trade associations; from land grant universities; and as senior officials of leading agribusiness companies.

The world's agricultural and food industry is expanding and remains in a constant state of change. Successful businesses and institutions must deal with rapidly shifting market conditions that are driven by international influences, technological innovations, policy shifts, weather conditions, emerging consumers and fluctuating consumer preferences. To continue succeeding in this environment, businesses must have access to reliable industry and market information and authoritative economic consulting services. It is IEG Vantage's economic expertise and diverse client base that combine to provide unique insights, risk management and strategic planning for agribusinesses around the world.

In its role as a world leader in comprehensive commodity, food industry and agribusiness research and consulting, IEG Vantage offers several broad categories of services:

- Research/Analysis/Evaluation
- Business Consulting
- Education/Training
- News/Communication
- Transportation, Energy and Industrials

Contact us at (901) 766-4438 or visit our website at www.informaecon.com to learn more about our broad range of services.

Exhibit 8E: Center Gulf Grain Exports	27	27
Exhibit 8F: West Texas Intermediate Crude Spot Price, Cushing, Oklahoma.....	27	27

Interim correction, additions, or suggestions to improve the value of this study are encouraged and welcomed. We thank those operators who cooperated in providing information for this report. We trust this THIRTY SECOND ANNUAL BARGE FLEET PROFILE will be a useful management tool for the water transport industry and a valued reference to allied services and suppliers.

IEG Vantage Conferences and Seminars

Throughout the year, Informa examines topics of importance to the agricultural, food, transportation and energy industries. Detailed and in-depth supply/demand outlooks for major commodities are highlighted at the conferences. In addition to Informa’s analysts and consultants, featured speakers are invited from across the globe and include industry experts, economists, politicians and bankers. The seminars also serve as a means to bring Informa clients together for informative discussion and debate.

<p>Agriculture Policy Roundtable</p> <p>Washington, DC May 22, 2019 <i>Contact: Joe.Somers@informaecon.com or (202) 899-6937</i></p>

Daily Energy Comments

The rally in global crude oil prices following the OPEC/non-OPEC agreement to curtail production in late 2016 is failing with US crude oil inventories soaring to record-high levels. The rise of US shale is altering the global landscape for energy markets and global economics.

- Are declining crude oil prices good or bad for the US and world economy?
- What factors will determine whether prices will continue to decline or is the US as swing producer the new norm?
- Has OPEC lost its grip on the world crude oil market with the US now the largest producing country?
- Can OPEC survive a prolonged selloff or will compliance decline with several countries already in civil disarray?
- If the US exports more crude oil, how will that impact the world market and US petroleum product prices?
- How or will low crude oil prices impact natural gas production and usage?

Get the answers to these questions and more from Informa's [Energy Service](#) and Informa's daily [Energy Comments](#).

To keep pace with the ever-changing energy price environment, subscribe to Informa's daily [Energy Comments](#).

The IEG Vantage daily [Energy Comments](#) can filter through all of the daily, weekly and monthly data, providing guidance on how to cope with significant price volatility during these extraordinary times.

IEG's daily [Energy Comments](#) provides in-depth analysis on the fundamental and technical aspects of the entire energy complex, including crude oil, the main petroleum products and natural gas. In addition, the report provides a comprehensive break down and analysis of the major Department of Energy and industry reports that influence the day-to-day fluctuations in the markets, which is supplemented with weekly flash reports that follow the key petroleum weekly and natural gas reports. The report includes IEG's meteorologist's forecasts on weather and key climatic events impacting the energy markets. Moreover, IEG delivers comprehensive yet concise information on the current US and world energy policies that impacts your business.

IEG's energy retainer service complements the daily market information and analysis and is concentrated primarily on risk assessment and risk management advice. IEG's retainer service allows clients the ability to manage their energy risk on their own terms with a customized risk management program. IEG's knowledge and experience in commodity risk evaluation makes our energy market outlooks invaluable when the bottom line is sensitive to energy risk.
